SHADOW NURSERY COMPANY

ARTHUR J. SHADOW

WINCHESTER, TENNESSEE

We employ only skilled and dependable labor, our propagating is under close supervision of a reliable field man. Buds for propagating are cut from trees of the highest bearing strains that are known to be absolutely true to name without a doubt. A lifetime of experience proves that dependable trees cannot be grown by accident and the best trees that can be grown are none too good for you. Since 1902 we have specialized in this particular line of business.

"FRUIT TREES OUR SPECIALTY"
WINCHESTER. — — TENNESSEE

WILL YOU BE IN THE MARKET FOR JUNE BUDDED PEACH TREES FALL 195⁶

Each year at this season, and before we begin budding, we write a select list of Orchardists for this information which will be of great benefit to us, as it will give us an idea of the varieties wanted. OUR SPECIAL CONTRACT PROPOSITION will save you money over the regular quotations later on in the season. All orders are booked in rotation as received and shipped in the same rotation.

Extreme labor conditions and production cost force us to confine our propagation of JUNE BUDS again to contracts and early booking. Until ~~JUNE 10, 1954~~ we are in a position to quote you SPECIAL.

~~XXXXXXXXXX~~
May 16 1955
SPECIAL NEW VARIETIES: Let us tell you about them. The budwood will be cut from bearing trees of known parentage. Should you have a SPECIAL VARIETY or STRAIN you want propagated, we will do this and cut the budwood from your bearing orchard.

VARIETIES LISTED IN RIPENING ORDER

Cardinal	Dixgem	Fair Beauty	Southland
Hiland	Coronet	Early Hiley	Red Elberta
Dixired	Redhaven	Halehaven	Sullivan Elberta
Redcap	Golden Jubilee	July Elberta	Elberta

Since 1902 we have specialized in this particular line of business. JOE SHADOW founded this firm and was one of the pioneers that gave the Orchardists the method of JUNE BUDDING peach trees. Our soil and climate is peculiarly adapted to the growing of the best JUNE BUDS in the South. Propagating is under close supervision and for three generations SHADOW GROWN TREES have stood the test of time.

REQUEST-BLANK FOR QUOTATION ONLY

SHADOW NUSERY COMPANY

SHADOW NURSERY COMPANY
Winchester, Tennessee

May 2, 1955

"Just for Information."

March 25, 1955 we had a most destructive hail storm in this locality, followed by nine nights of freezing weather that played havoc with a portion of our seedlings we had expected to bud this season, this similar condition exists with all Nurserymen in this part of Tennessee.

Fortunately we had one block seed planted two weeks later that was not out of the ground and from this block we hope to bud from 60,000 to 75,000 JUNE BUDDED PEACH and definately we will be forced to confine this budding to varieties wanted by our customers and friends, for early contracts and bookings.

Until May 16, 1955 we will quote contract prices on your variety list wanted for fall planting, subject to crop conditions and from these lists we will make our plans for budding.

We do appreciate the nice business our loyal customers and friends have given us all during these past years. We solicit continuance of same, assuring you that we will supply present demands as far as possible.

We always cut our budwood for budding from known sources, true to name without a doubt, grow to the highest standard possible. All these operations are under close supervision.

Yours truly,
Shadow Nursery Company

Arthur J. Shadow
